

Ergonomics Roundtable of Sacramento Presents:

**WHEN: May 5, 2015
9:00-11:30 a.m.**

Ergonomics Certifications and Tools for Ergonomic Evaluations in Industrial Settings

Featured Speaker: Susan Tingley, MS, PT, CIE

The first part of the meeting, we will explore the requirements, similarities and differences between board certifications and an assortment of certificates of completion in ergonomics. What do all those initials mean.... CPE, AEP, CIE, CAE, CEES and more?

During the second part of the meeting, you will learn ways to expose root causes, mitigate risks, and improve productivity in a wide range of industrial setting by implementing a systematic approach to ergonomics. Learn methods for identifying and quantifying risks and practical, problem solving techniques for work improvement. Examples of analysis tools, case studies, and successful approaches will be discussed.

Susan Tingley is a Physical Therapist and Certified Industrial Ergonomist with over 15 years of experience providing effective ergonomics consulting in both office and industrial settings. She is passionate about ergonomics training and evaluation and enjoys the challenge of improving the match between the person, the job tasks, and the equipment. Ms. Tingley's approach is to cultivate practical solutions to maximize productivity, reduce risk and minimize costs. Ms. Tingley is the founder of OneErgoNet, a network of expert Ergonomist, Physical Therapists, Occupational Therapist and other highly experienced ergonomics experts.
