

**Ergonomics Roundtable of
Sacramento Presents:**

**WHEN: March 9, 2010
9:00-11:30 a.m.**

Visitation Safety and Ergonomics in Home Health Care

Presented by John Gargiulo & Kristy Schultz

John will lead a discussion about the information that is of value when preparing for an in-home client visitation and the things to look for to reduce your risk during home visitation. Kristy will lead a discussion about strain & sprain prevention techniques and equipment used in home health care.

ABOUT OUR SPEAKERS...

John Gargiulo, M.S, CIH, CSP is a Sr. Loss Prevention Specialist at CSAC-Excess Insurance Authority, a Public Entity. His work history includes: HP Global as an IH and Ergonomics Program Manager; Aerojet Liquid Rocket Company as an IH program Manager; Cal/OSHA Consultation; Oregon OSHA Consultation; Lawrence Livermore Labs, and SAIF Corporation. Mr. Gargiulo holds a B.S. Biology and an M.S. in Health Science with an emphasis in Occupational and Environmental Health.

Kristy Schultz, M.S., CIE is an Ergonomics Consultant at State Compensation Insurance Fund. Kristy holds a M.S. in Human Factors and Ergonomics and a B.A. in Health and Community Services, Health Education. She previously worked at Cal/OSHA in the Research & Education Unit as an ergonomics specialist where she developed and wrote educational material in ergonomics for a variety of industries. During her time as an ergonomics consultant with State Fund, she has consulted with employers to identify risk factors and propose control measures in a variety of workplaces. Kristy has been a speaker on ergonomics in the workplace to employer groups, various organization, and national conferences.

THANK YOU TO OUR SPONSOR...

Omega Health Systems provides ergonomics consulting services, training systems and software solutions—both onsite and online—to help you assess risk, reduce discomfort, and prevent injury, in order to protect your most precious asset: Your Health!

Their signature ergonomic systems represent bundles of services that are designed to be implemented together, or as modular pieces to fit your ergonomic needs exactly. These systems include: ErgoMed, ErgoFit, Employment Testing, ProjectErgo, and Cardinus Software.
